# Shahid Rasheed

Laravel Back-End Developer | PHP, MySQL, Livewire | Helped  
Businesses Automate Workflows & Save Time  
Lahore, Punjab, Pakistan

## Summary

I am a highly skilled full-stack web developer with a comprehensive proficiency in a wide range of technologies and a proven track record of crafting dynamic and responsive web applications. My expertise spans across multiple domains, including:

### Back-End Development:

Laravel  
PHP  
Livewire  
MySQL

### Front-End Development:

JavaScript  
HTML  
CSS  
Bootstrap

My proficiency in Laravel empowers me to engineer efficient and scalable back-end solutions, ensuring optimal performance and robust functionality. Simultaneously, my mastery of HTML, CSS, and Bootstrap allows me to create visually captivating and user-centric interfaces, enhancing the overall user experience.

Incorporating interactive and engaging features into web applications is second nature to me, thanks to my comprehensive knowledge of JavaScript. Furthermore, my expertise in PHP and MySQL enables me to adeptly manage data and execute server-side functionalities with precision.

I am deeply passionate about harnessing these skills to craft top-tier web experiences and deliver innovative solutions that align seamlessly with client requirements. My development philosophy is grounded in the principles of clean code and meticulous attention

to detail, ensuring the creation of robust and high-performance applications.

As a proactive learner, I consistently stay abreast of the latest industry trends, continually expanding my skill set to remain at the forefront of web development. If you are seeking a dedicated and versatile full-stack web developer for your next project, I invite you to reach out. I am open to exciting opportunities that allow me to collaborate on impactful ventures.

## Experience

### Reownlogics

#### Laravel Developer

March 2024 - Present (1 year 9 months)

Lahore, Punjab, Pakistan

At Reownlogics, I design and develop scalable, full-stack web applications across multiple domains, including real estate, HR management, task management, and celebrity engagement platforms. I work closely with product managers, front-end teams, and stakeholders to deliver secure, high-performance, and user-friendly solutions.

#### Key Contributions & Achievements:

##### Backend Development & API Design:

Developed and maintained robust back-end systems using Laravel 8/10/11.

Designed scalable APIs and integrated with front-end frameworks (Livewire, Alpine.js, Tailwind CSS, Bootstrap).

Implemented modular and service-oriented architecture for maintainability and scalability.

##### Payment & Monetization Systems:

Integrated multi-currency payment gateways (Paystack, Flutterwave) across platforms.

Built pre-authorization, refund, and commission workflows for marketplace & fan engagement platforms.

Enabled secure digital product and service purchases.

#### Real-Time & Interactive Features:

Implemented real-time notifications, chats, and activity tracking using Pusher and WebSockets.

Developed live video, webinar, and group interaction features for platforms like Stagger.

#### Data Management & Optimization:

Optimized MySQL/MariaDB databases, improving query performance and reducing response time.

Implemented structured data models for complex systems (HRMS, CRM, task management).

Handled large-scale data imports and reporting for business intelligence dashboards.

#### Security & Authentication:

Managed multi-guard authentication, OAuth integrations, 2FA, and role-based permissions (Laravel).

Ensured data security and compliance across all applications.

#### Collaboration & Project Delivery:

Coordinated with cross-functional teams to analyze requirements and design scalable solutions.

Delivered multiple full-cycle projects, including HRMS, CRM systems, and celebrity-fan interaction platforms, on time and within specifications.

Junior Web Developer  
January 2023 - March 2024 (1 year 3 months)  
Lahore, Punjab, Pakistan
